1903-1904

PRESS OF FRANK WOOD, BOSTON

## Correspondence

---

All inquiries regarding admission (including admission to graduate courses) should be addressed to Miss ELLEN F. PENDLETON, Dean of the College.

Applications for general information should be addressed to Miss MARY CASWELL. As Secretary of the Teachers' Registry, Miss CASWELL is also prepared to furnish full and confidential information in regard to the qualifications, character, and experience of teachers educated at Wellesley. Former students of the College who wish situations as teachers have the aid of the Teachers' Registry.

Applications for pecuniary assistance (see p. 126) should be made by letter addressed to the Secretary of the Students' Aid Society, Wellesley, Mass.

## Foundation and Purpose

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed, by usage or statute, to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively and positively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G.

Houghton and Mr. Clement S. Houghton, as a memorial to their father. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday, the singing is led by a trained choir of students under the direction of the professor of music.

The Wellesley College Christian Association, organized to promote religious life, to arouse an intelligent interest in social reforms, and to foster interest in home and foreign missions, meets weekly for prayer and religious instruction in the chapel given by the founder of the College.

The department of Biblical History affords the systematic study of the Bible required of all students.

## Admission

### Admission to the Freshman Class

Students are admitted either by examination (see pages 22 to 24) or by certificate (see pages 24 to 26).

*Every candidate for a degree must offer for admission to the freshman class the following subjects: English, History, Algebra, Plane Geometry, Latin, and in addition the maximum requirement in a second language (which may be either Greek, or French, or German), together with the minimum requirement in a third language or in one of the following sciences: Chemistry, Physics. For full details regarding requirements in these subjects see pages 26 to 38.*

The subjects prescribed for admission are divided into three groups, A, B, C, as follows:—

*Group A.* History, Plane Geometry, Cæsar, Vergil and Prosody, Cicero, Anabasis, Greek Grammar, Iliad, German (reading, poetry, and technical grammar of maximum requirement), and French (reading, poetry, and technical grammar of maximum requirement).

*Group B.* Chemistry and Physics.

*Group C.* English Literature and Composition, Algebra, Latin Prose Composition, Greek Prose Composition, French Prose Composition and Conversation of maximum requirement, German Prose Composition and Conversation of maximum requirement, Greek, French and German minimum requirements.

Final examinations in subjects of *Group A* may be taken *at any time* during the college preparatory course. Final examinations in subjects of *Group B* must be taken not earlier than *fifteen months before entrance* in September. Final examinations in subjects of *Group C* must be taken *not earlier than during the school year immediately preceding admission to college.*

☞ The above applies to final examinations held by principals of schools, preliminary to granting certificates, as well as to the admission examinations held by the College.

Candidates will not be admitted if conditioned in two, or heavily conditioned in one, of the following subjects: Latin, Greek, French, German, Mathematics, Chemistry, Physics.

A candidate for admission must be at least sixteen years of age, and must present satisfactory evidence of good moral character and good health. A blank form for the certificate of health will be sent to all registered applicants for admission.

The student who has met all entrance requirements is qualified for immediate matriculation for the Baccalaureate degree in Arts.

All communications concerning admission should be addressed to the Dean of Wellesley College, Wellesley, Mass.

## Admission by Examination

### June Examinations

*Candidates who propose to enter by examination must take all examinations in June, except such as, by permission, may be postponed until September.*

In June, 1904, the entrance examinations of Wellesley College will be the examinations of the College Entrance Examination Board, of which Wellesley College is a member. These examinations will be held June 20-25, 1904.

In order to meet the requirements for admission to Wellesley College, candidates must pass examinations in the following subjects, as defined in the Documents issued by this Board :—

English : a, b.

History : a, or c, or d.

Mathematics : a (i, ii), and Progressions, c.

Latin : a, b, c, d, l, m.

Maximum Second Language :

Greek : a, b, c, f, g ; or

French : a, b ; or

German : a, b.

Minimum Third Language or Science :

French : a ; or

German : a ; or

Chemistry ; or

Physics.

All applications for examination must be addressed to the Secretary of the College Entrance Examination Board, Post Office Sub-Station 84, New York, N. Y., and must be made upon a blank form to be obtained from the Secretary of the Board upon application.

Applications for examination at points in New England, the Middle States, or Maryland, must be received at the office of the Secretary of the Board not later than Monday, June 6.

Applications for examination at other points in the United States or in Canada must be received not later than May 30.

Applications for examination at points outside of the United States and Canada must be received not later than May 16.

Applications received later than the dates named will be accepted when it is possible to arrange for the examination of the candidates concerned, but only upon payment of five dollars in addition to the usual examination fee. Candidates filing belated applications do so at their own risk.

The examination fee is five dollars for all candidates examined at points in the United States and Canada, and fifteen dollars for all candidates examined at points outside of the United States and Canada.

A list of places at which the examinations are to be held in June, 1904, will be published about March 1st. In order that they may receive proper consideration, requests that the examinations be held at particular points should be transmitted to the Secretary of the Board not later than February 1st.

### September Examinations

Admission examinations will be held at the College in September as heretofore. These examinations are open to those candidates only who propose to enter in September, 1904.

2.00- 4.45	French (maximum).

## Admission by Certificate

Any school whose equipment and curriculum enable it to prepare students for the freshman class, upon complying with the regulations stated below, may receive the right to give a certificate of scholarship which shall exempt the candidate from college examinations for admission in the subjects satisfactorily covered by the certificate.

## Right of Certification

I. If a school has not the right of certification and the principal wishes to obtain this privilege, he should apply to the Dean of the College between October first and March first of any year. In response to this application a blank form will be sent, which the principal is requested to fill out and return, sending with it a catalogue or circular of the school. *Specimen laboratory notebooks* must be submitted before science courses will be approved.

*During the interval between March first and October first applications for the right of certification will not be considered by the Board of Examiners.*

2. The school is considered to be on probation during the first year of the first candidate. The right of certification may be withdrawn at any time from any school which fails to give complete and satisfactory preparation.

With the formation of the New England College Entrance Certificate Board all certificate privileges granted by the College will expire by limitation on *January 1, 1904*, and every third year thereafter.

In accordance with the By-Laws and Rules adopted by the New England College Entrance Certificate Board, *any school in New England* desiring a renewal of these certificate privileges must apply to the Secretary of this Board, Prof. Nathaniel F. Davis, 159 Brown Street, Providence, R. I.

*Schools outside of New England* desiring a renewal of these certificate privileges must apply to the Dean of the College as heretofore. Such application must be made before March first of any year in order to secure the admission of candidates in the following September.

### Certificate of Scholarship

1. After a school has received the right of certification, the principal must present, upon a blank form furnished by the College, a certificate of scholarship for each candidate.

2. All certificates and laboratory notebooks must be forwarded in time to be received at the College *by July first*. On or before August 1st each candidate will be informed of the decision with regard to her certificate. Certificates received *after July first* may be refused, and in any case the decision will be necessarily delayed to the great disadvantage of the candidate.

3. All certificates must show distinctly that the candidate has met in detail the requirements as published in the current Calendar. Whenever any variation has been allowed, the work done must be specifically stated and offered as an equivalent, to be accepted or refused. *Attention is called to the division of the admission subjects into Groups A, B, C, stated on pages 20 and 21, and to the fact that final examina-*

*tions in the subjects of Groups B and C must be taken within a specified time of admission.*

4. All certificates must be signed by the principal of the school, and countersigned by the assistants who have instructed the candidate.

5. Partial certificates from two accredited schools will not be accepted for the admission of a candidate, unless permission has been obtained from the Board of Examiners.

6. All work completed after July 1st must be tested by examination at the College in September. Certificates for such work will not be accepted.

7. The candidate who has received the certificate of a principal will not be exempt from the examinations for admission in any particular subject, unless her certificate shows that she has satisfactorily accomplished the full amount of work required in that subject. Any student whose certificate is found on July 1st to be seriously deficient, may be refused the privilege of taking examination the following September.

## Requirements for Admission

### 1. English

*Composition.*—The subjects for the examination in Composition will be taken from the English Literature required for the year. The form of the examination will usually be the writing of a paragraph or two on each of several topics, to be chosen by the candidate from a number set before her in the examination paper in English Literature. The treatment of these topics is designed to test the candidate's power of clear and accurate expression, and will call for only a general knowledge of the substance of the books.

To meet the requirement in Composition:—

A. There should be practice in writing equivalent to fortnightly themes the first two years, and weekly themes the last two years of the preparatory course. The subjects for themes should not be

drawn chiefly from books. The student should be led, especially for short themes, to choose her own subjects, based on daily experience and observation. No applicant will be accepted in English whose work is notably defective in point of spelling, punctuation, grammar, idiom or paragraph structure.

*B.* There should be systematic study of Rhetoric made subservient to the work in Composition. Particular attention should be given to principles of structural organization in the sentence, paragraph, and whole composition; to unity, emphasis, and coherence; to good use in words; and to the analysis and topical outlining of essays. The following books are recommended:—

Scott and Denney's *Composition-Rhetoric*; A. S. Hill's *Foundations of Rhetoric*, and as companion book, Huber Gray Buhler's *Practical Exercises in English*; Herrick and Damon's *Composition and Rhetoric*; Newcomer's *Rhetoric*; Carpenter's *Exercises in Rhetoric and Composition* (High School Course).

*Literature.*—The Wellesley requirement is that adopted by the Commission of New England Colleges.

*A.* Reading.

Certain books are set for reading. The candidate is required to present evidence of a general knowledge of the subject-matter, and to answer simple questions on the lives of the authors.

The books set for this part of the examination are:—

In 1904 and 1905: Shakespeare's *The Merchant of Venice* and *Julius Cæsar*; the *Sir Roger de Coverley Papers*; Goldsmith's *The Vicar of Wakefield*; Coleridge's *The Ancient Mariner*; Scott's *Ivanhoe*; Carlyle's *Essay on Burns*; Tennyson's *The Princess*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

In 1906, 1907, and 1908: Shakespeare's *Macbeth* and *The Merchant of Venice*; the *Sir Roger de Coverley Papers*; Irving's *Life of Goldsmith*; Coleridge's *The*

*Ancient Mariner*; Scott's *Ivanhoe* and *The Lady of the Lake*; Tennyson's *Gareth and Lynette*, *Lancelot and Elaine*, and *The Passing of Arthur*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

## B. Study and Practice.

This part of the examination presupposes the thorough study of each of the works named below. The examination will be upon subject-matter, form, and structure.

The books set for this part of the examination are :—

In 1904 and 1905: Shakespeare's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*.

In 1906, 1907, and 1908; Shakespeare's *Julius Cæsar*; Milton's *L'Allegro*, *Il Penseroso*, *Comus*, and *Lycidas*; Burke's *Speech on Conciliation with America*; Macaulay's *Essay on Milton and Life of Johnson*.

NOTE.—In the Wellesley examination it is taken for granted that candidates will have learned by heart illustrative passages from all poems read.

## 2. History

A full year course with at least three recitations per week in *one* of the following subjects :—

The History of Greece to the death of Alexander, with due reference to Greek life, literature, and art.

The History of Rome, the Republic and Empire to the accession of Commodus.

English History, with due regard to social and political development.

American History, with the elements of Civil Government.

In the subject chosen, the student should acquire accurate knowledge of the history as presented in a standard text-book of not less than 300 pages, and should read such fuller authorities as may be available, in amount not less than 500 pages. Some practice in drawing maps to illustrate territorial changes, in making digests of lectures and reading, and in preparing verbal or written reports on subjects assigned for individual investigation is essential to successful work.

As an alternative to any one of the courses described above, a course in Greek and Roman History may be offered, provided the time given to the combined course is not less than one hundred and fifty recitations.

Students presenting themselves for examination are expected to bring notebooks, maps, and essays, that may serve as supplementary evidence of the character of their preparation.

### 3. Mathematics

*Algebra.*—Factors, Common Divisors and Multiples, Ratio and Proportion, Theory of Exponents, Radicals and Equations involving Radicals, Inequalities, Quadratic Equations (including the theory), Imaginary Quantities, Binomial Theorem, Arithmetic and Geometric Progressions.

*Plane Geometry.*—As found in Chauvenet, or its equivalent.

Deficiency in preparation usually results from one or more of the following causes: the use of text-books which are too elementary, insufficient time spent in preparation, neglect of exercises in original demonstration in Geometry, and of reviews in both Algebra and Geometry. One and one-third years, with daily recitations, is the shortest time in which satisfactory preparation can be made in Algebra, and one year with daily recitations is the minimum in Geometry. It is strongly urged that there be constant exercise in

original demonstration in Geometry, with frequent written examinations in both Algebra and Geometry, the problems proposed being drawn from other sources than the text-books.

#### 4. Latin

Grammar, including Prosody.

*Prose Composition.*—The study of this subject should be continued through the course, and should include:—

(1) A *systematic study* of the main principles of Latin syntax. In order to secure the thorough drill required, a standard text-book which gives such systematic study should be completed.

(2) The writing of at least forty connected passages based upon the Latin of Cæsar and Cicero.

Cæsar, *Gallic War*, four books.

Cicero, seven orations, or six if the *Manilian Law* be one.

Vergil, *Æneid*, six books.

Candidates must be prepared to translate at sight Latin of average difficulty, and to write in Latin connected passages based upon Cæsar and Cicero.

Equivalents are accepted, but verse is not accepted in place of prose, nor anything instead of the required translation of English into Latin.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college.

#### 5. Greek

##### Maximum Requirement

Grammar. *The etymology must be thoroughly mastered.*

*Prose Composition.* At least forty written exercises based upon the Greek of Xenophon, including connected passages and accompanied by a systematic study of the main principles of syntax.

Xenophon, *Anabasis*, three books.

Homer, *Iliad*, three books ; with scansion.

Candidates must be prepared to translate at sight both Attic and Homeric Greek of average difficulty, and to write in Greek a connected passage based upon Xenophon.

Particular attention should be given to the correct writing of Greek with the accents, to exercises both oral and written, and to the use of the blackboard for constant practice upon forms and constructions.

The teachers of Latin and Greek in the preparatory schools are urged to insist upon the use of good English in translation.

Ability to read at sight either easy French or German prose is of great advantage to all classical students.

*In September, 1905, and thereafter*, the preparation for the maximum requirement must cover a period of three years, with four or five recitations per week. If the preparation is made in less time, an examination in Prose Composition may be required.

#### Minimum Requirement

Systematic study of etymology from Goodwin's or Hadley and Allen's *Grammar*, in connection with a book of First Lessons. *Anabasis*, about thirty pages. Practice in writing Greek.

This work requires at least one year, with five recitations per week. This preparation admits the student to course 14 in College, and these two courses complete the preparation for course 1 (see page 40).

## 6. French

#### Maximum Requirement

To meet the requirement in French the candidate must be prepared in the following :—

(1) Grammar: a knowledge of the etymology and the essential principles of syntax, especially the use of moods and tenses.

(2) Composition: familiarity with the commoner idioms, and ability to translate connected passages of easy English into French at sight.

(3) Reading: not less than five hundred duodecimo pages of classical and contemporary prose and verse from at least four standard authors.

(4) Conversation: ability to follow a recitation conducted in French, to answer questions in that language, and to repeat some short selections from French prose and poetry.

These results can be best attained by the use of the books indicated for College Courses 1 and 2, or their equivalents (see pages 54 and 55 of present Calendar).

The preparation for the maximum requirement in French should cover a period of at least two years, five recitations per week.

*In September, 1905, and thereafter*, the preparation for the maximum requirement must cover a period of three years with four or five recitations per week. If the preparation is made in less time, an examination will be required.

#### Minimum Requirement for 1904

As the minimum requirement a student may offer either *A* or *B*:—

*A.* The first year of the maximum requirement, viz.:—

(1) Grammar: including the conjugation of the regular and the more usual irregular verbs.

(2) Composition: translation into French of connected passages of simple English.

(3) Reading: at least two hundred duodecimo pages from at least three different authors. Not more than one half of this should be from works of fiction.

(4) Conversation: ability to answer in French questions on simple subjects and to repeat short selections from choice French poetry. French should be the language of the class room.

- B.* (1) Grammar as for minimum *A.*  
(2) The ability to read easy prose at sight.

The student should translate, with careful attention to the grammar, at least three hundred pages from such works as *La Prise de la Bastille*, by Michelet; *La Mare au Diable*, by George Sand; *La Chute*, by Victor Hugo; or the prose of such authors as Souvestre, Daudet, and About. The selections should be made from at least four different authors.

Students meeting minimum requirement *B* may be admitted to course 16, but not to course 2 without additional preparation. The preparation for the minimum requirement in French should cover a period of at least one year, five recitations per week.

#### Minimum Requirement for 1905 and Thereafter

*In September, 1905, and thereafter*, a student may offer but one minimum requirement. The preparation for this requirement should comprise

- (1) Careful drill in pronunciation.
- (2) The rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural of nouns, the inflection of adjectives, participles, and pronouns; the simpler uses of the conditional and subjunctive, and the elementary rules in syntax; the order of words in the sentence, and application in the construction of sentences.
- (3) Abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression.
- (4) Writing French from dictation.
- (5) The reading of 300 duodecimo pages of graduated texts from at least three different authors, with constant practice in translating into French easy variations upon the texts read (the teacher giving the English), and in reproducing from memory sentences previously read.

(6) Frequent abstracts, sometimes oral and sometimes written, of portions of the text already read.

If the time given to the preparation is less than one year with five recitations per week, an examination will be required.

## 7. German

### Maximum Requirement

To meet the maximum requirement in German the candidate must have :—

(1) A distinct German pronunciation, which may be acquired at the outset by a course in phonetics.

(2) A knowledge of the important rules of elementary grammar, which the student should be able to state in German, and to illustrate by original examples.

(3) Ability to understand spoken German, an easy lecture or story, which will be acquired if German is made the language of the class room.

(4) Fluency in conversation upon simple topics, and knowledge of German idioms, which are gained by object lessons according to Pestalozzi's Anschauungs method, and by constant speaking exercises.

(5) Ability to understand and recite some short specimens of choice lyric poetry.

(6) Ability to translate easy German at sight.

(7) Ability to translate easy English into German, to write simple compositions, and to use the German script.

These results can be obtained by the following course or its equivalents :—

Grammar : *Deutsche Sprachlehre*, by Wenckeback, or *Lehrbuch der Deutschen Sprache*, by Spanhoofd.

Prose composition : *German Composition*, by Wenckeback, pp. 11-109 and pp. 165-210.

Reading : *Glück Auf*, by Müller and Wenckeback. An easy story for practice in sight reading (*e. g.*, Meissner's *Aus meiner*

*Welt*), a drama (e. g., Schiller's *Wilhelm Tell*), and Goethe's *Hermann und Dorothea*.

Conversation: *Glück Auf*, by Müller and Wenckebach, or *Deutscher Anschauungs-Unterricht*, by Wenckebach, pp. 1-52, 78-82, 91-117, 128-161. Idioms, pp. 315-332 (see preface).

Poetry: *Die Schönsten Deutschen Lieder*, compiled by Wenckebach; the first five "Volkslieder," and numbers 2, 3, 8, 10, 14, 15, 18, 19, 20, 21, 22, 23, 26, 28, 30, 32, 33, 34, 37, 40, 42, 45, 46, 47, 50, 51, 52, 59, 60, 61, 62, 63, committed to memory.

The preparation for the maximum requirement in German should cover a period of at least two years, five recitations per week.

*In September, 1905, and thereafter*, the preparation for the maximum requirement must cover a period of three years with four or five recitations per week. If the preparation is made in less time an examination will be required.

#### Minimum Requirement for 1904

As the minimum requirement, a student may offer either *A* or *B*.

*A.* The first year of the maximum requirement, namely:—

(1) *Deutsche Sprachlehre*, pp. 1-150, or Spanhoofd, pp. 1-160; *German Composition*, pp. 1-55; (2) Reading: *Glück Auf*. The poetry in it to be committed to memory; (3) Speaking exercises; *Deutscher Anschauungs-Unterricht*, pp. 1-36. Idioms, pp. 315-319.

*B.* The ability to read easy prose at sight.

The student should translate, with attention to the grammar, at least two hundred pages of such German texts as Andersen's *Bilderbuch ohne Bilder*, Fouqué's *Undine*, Chamisso's *Peter Schlemihl*.

The preparation for the minimum requirement in German requires at least one year, five recitations per week, and should not be crowded into a shorter time.

Equivalents will be accepted; but reading will not be taken in place of grammar, nor poetry for conversation, etc.

#### Minimum Requirement for 1905 and Thereafter

*In September, 1905, and thereafter*, a student may offer but one minimum requirement. The preparation for this requirement should comprise

(1) Careful drill upon pronunciation and use of German script.

(2) The memorizing and frequent repetition of easy colloquial sentences.

(3) Drill upon the rudiments of grammar; that is, upon the inflection of the articles, of such nouns as belong to the language of every-day life, adjectives, pronouns, weak verbs, and the more usual strong verbs; also upon the use of the more common prepositions, of the modal auxiliary, and elementary rules of syntax and word order. This drill upon the rudiments of grammar should be directed to the ends of enabling the pupil (1) to use his knowledge with facility in the formation of sentences, and (2) to state his knowledge correctly in the technical language of grammar.

(4) Abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression. These exercises should include practice in the translation into German of easy variations upon the matter read, and also in the offhand reproduction, sometimes orally and sometimes in writing, of statements of short and easy selected passages.

(5) The reading of one hundred and fifty to two hundred pages of graduated texts from a reader of easy stories and plays.

If the time given to the preparation is less than one year, with five recitations per week, an examination will be required.

## 8. Chemistry

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, *Document No. 12*.

The preparation in Chemistry should cover at least one year, five recitations per week. Experiments should be done by the student in the laboratory to illustrate the properties of the most important elements, both metallic and non-metallic, and their compounds, and it is strongly recommended that a few of these experiments should be of a quantitative nature.

In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and must be presented with the certificate on or before July 1st, or at the time of the examination. In case the notebook is lacking or inadequate, a laboratory test will be given.

## 9. Physics

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, *Document No. 12*. Preparation in Physics should cover at least one year, with five recitations per week. In addition to an examination, or a certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must be indexed and bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and they must be presented with the certificate on or before July 1st or at the time of the examination.

## 10. Zoology

N. B.—Zoology will not be accepted for admission after 1904.

Colton's *Practical Zoology*, except those parts which involve the use of the compound microscope. The student must be

able to recognize the animals, and to make the dissections described in that book. It is suggested that the work be done from the biological standpoint, and the use of Jordan and Kellogg's *Animal Life* as supplementary reading is warmly recommended.

The preparation in Zoology should cover at least one year, five recitations per week. In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and must be presented on or before July 1st with the certificate or presented at the time of the examination.

### Admission to Advanced Standing

Candidates for advanced standing must fulfill the requirements for admission to the freshman class, and must also be prepared to be examined in the required studies previously pursued by the class which they wish to join, and in a sufficient number of electives to give full standing with that class.

Such candidates, if they come from other colleges, may present certificates of college work; but it should be clearly understood that they are not thereby necessarily relieved from examinations.

Each candidate should apply for a statement of the credentials which she will need to present.

Candidates for advanced standing whose applications are filed *before May 1st* of the year in which they propose to enter, and whose credentials admit them *to junior or higher rank*, will take precedence of candidates for the freshman class in the assignment of rooms.

All correspondence should be addressed to the Dean of the College.

### Admission of Students not Candidates for a Degree

Opportunities for special study are offered to students who are not candidates for a degree, but are qualified to undertake college work.

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Examiners, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities of prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and acquirement are not ordinarily admitted, but if such desire admission they must expect to meet, by examination or by certificate from an accredited school, the requirements prescribed for admission to the freshman class, or a full equivalent for them, and to satisfy such additional requirements as are prescribed by the departments which they propose to enter.

All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses in two or more departments will be granted a certificate.

As the capacity of dormitories is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college dormitories.

Application for admission as a special student, with all required certificates, should be sent to the College before the first of July, if possible. All correspondence should be addressed to the Dean of the College.

## Courses of Instruction

The following Courses of Instruction are offered by the several departments. The College reserves the right to withdraw the offer of any course not chosen by at least six students.

### I. Greek

1. Lysias (selected orations); Plato: *Apology and Crito*; English into Greek, exercises based on prose read; Homer: *Odyssey* (selections amounting to about 2,500 verses).

*Open to students who have met maximum admission requirement. Four hours a week for a year.*

A separate division reciting three times per week may be formed for students above freshman rank.

Professor Chapin, Associate Professor Montague,  
Associate Professor Edwards.

2. Attic Orators: selections; Euripides: one drama.

*Open to students who have completed course 1. Three hours a week for a year.*

Associate Professor Montague.

3. Historians: selections, chiefly from Herodotus and Thucydides; Æschylus: *Persians*.

*Open to students who have completed course 1. Three hours a week for a year.*

12. Practical Problems in Economics.

*Open to students who have completed course 1. Three hours a week for the second semester.*

Professor Coman, Associate Professor Balch.

The subject for 1903-1904 will be drawn from the phenomena of production comprising a study of the development of modern capitalism, the theory and history of monopolies, and present tendencies in the United States.

This course should normally follow course 1, and with it constitute the work of the first year in economics.

## XII. Pure Mathematics

1. Required course for freshmen.

*Four hours a week for a year.*

(a) Solid and Spherical Geometry.

*Three hours, first semester.*

(b) Higher Algebra.

*One hour, first semester; two hours, second semester.*

The subjects included are: Functions and Theory of Limits, Derivatives, Development of Functions in Series, Convergency of Series, Theory of Logarithms, Determinants, Theory of Equations (including Sturm's Theorem). (Taylor's *College Algebra*.)

## (c) Plane Trigonometry.

*Two hours, second semester.*

The angular analysis, including transformations, trigonometric equations and inverse functions, is fully treated, as well as the solution of triangles and the practical use of the tables.

Associate Professor Chandler,  
Associate Professor Merrill, Dr. Vivian,  
Miss Hathaway, Miss Rousmaniere.

## 2. Conic Sections and Plane Analytical Geometry.

*Open to students who have completed course 1. Three hours a week for a year.*

Associate Professor Merrill, Dr. Vivian.

A brief course in geometrical conics is given in connection with the usual analytical work.

## 12. Algebraic and Trigonometric Analysis.

*Open to students who have completed course 1. One hour a week for a year.*

Professor Burrell.

## 3. Differential and Integral Calculus.

*Open to students who have completed course 2. Three hours a week for a year.*

Professor Burrell.

The applications include a course in curve tracing.

## 4. Theory of Equations, with Determinants (Burnside and Panton).

*Open to students who have completed course 3. Three hours a week for the first semester.*

Associate Professor Chandler.

## 5. Solid Analytical Geometry (C. Smith).

*Open to students who have completed course 3. Three hours a week for the second semester.*

Associate Professor Chandler.

## 6. Modern Synthetic Geometry.

*Open to students who have completed course 2. Three hours a week for a year.*

Professor Burrell.

Metrical and projective properties of plane and sheaf forms of the first and second orders; the anharmonic ratio; harmonic forms; the method of inversion; involution; collineation; the law of duality; theory of poles and polars; reciprocation; space forms and surfaces of the second degree. Given by lectures and references.

## \*9. Differential Equations (Johnson).

*Open to students who have completed course 4. Three hours a week for the second semester.*

Associate Professor Chandler.

## †10. Differential Equations (Forsyth).

*Open to students who have completed course 4. Three hours a week for a year.*

Associate Professor Chandler.

Advanced course, intended primarily for graduate students.

## 11. Projective Geometry.

*Open to students who have completed course 3. Three hours a week for a year.*

Professor Burrell.

A lecture course, introductory to the principles of modern geometry. The method of treatment is analytic.

**XIII. Applied Mathematics**

## 1. Introduction to the Mathematical Treatment of Science.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Hayes.

\* Not offered in 1903-1904.

† Withdrawn for the current year.

## 2. Practical Astronomy.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Hayes.

It is the aim of the course to familiarize the student with the fundamental facts of astronomy, and especially with the processes of observation and reasoning by which these facts are discovered. Out-of-door observations and instrumental work in the observatory will form the basis of the course.

## †3. Thermodynamics.

*Open to students who have completed course 1. Three hours a week for the first semester.*

Professor Hayes.

## †4. Theoretical Mechanics.

*Open to students who have completed course 1. Three hours a week for the first semester.*

Professor Hayes.

This course is a continuation of course 1, and is devoted to the further development of the principles of kinematics, statics, and kinetics.

## 5. Geodynamics.

*Open to juniors and seniors properly qualified. Three hours a week for the second semester.*

Professor Hayes.

Both the astronomical and geological aspects of the subject are emphasized. In general, the topics discussed are: precession, nutation; form, size, density of the earth; thermal condition of the earth, theories concerning its crust.

## †6. Advanced Astronomy.

*Open to students who have completed courses 1 and 2. Three hours a week for a year.*

Professor Hayes.

+Withdrawn for the current year.

This course includes special work with the transit and the equatorial. The theory of the parabolic orbit is presented, and one such orbit determined.

#### XIV. Chemistry

##### 1. General Chemistry.

*Open to all undergraduates. Freshmen four hours a week for a year; all other students three hours a week for a year.*

Associate Professor Bragg.

Course 1 is for beginners in Chemistry, and is intended to familiarize the student with the important properties of the elements—especially the non-metallic ones—and their compounds; with their modes of preparation, and with such tests as shall lead up to the study of systematic Qualitative Analysis; also to present the laws governing chemical reactions, the meaning of chemical equations, and the more recent theories adopted in the science.

All of the more simple experiments are performed by the student herself in the laboratory.

##### 2. Qualitative Analysis.

*Open to students who have completed course 1. Three hours a week for the first semester.*

Miss Jackson.

This course supplements course 1 by presenting the properties and characteristic reactions of the metallic elements. Practical methods of separating and recognizing the elements present in simple mixtures are taught, and the progress of the student is constantly tested by the examination of simple substances, the exact composition of which is unknown to the student.

##### 3. Organic Chemistry.

*Open to students who have completed course 1. Three hours a week for the second semester.*

Professor Roberts.

This course includes a somewhat careful study of the saturated series, dealing very briefly with the unsaturated and benzene series. Experiments are performed in the laboratory to illustrate the behavior of representative substances, and a limited number of preparations are made to familiarize the student with the more common processes of Organic Chemistry.

4. Advanced General Chemistry and Qualitative Analysis.

*Open to freshmen who have met the admission requirement in Chemistry. Four hours a week for a year.*

Miss Jackson.

5. Quantitative Analysis.

*Open to students who have completed course 2 or 4. Three hours a week for the second semester.*

Miss Jackson.

In this course a few typical processes involving both volumetric and gravimetric methods will be taught, to illustrate general principles of Quantitative Analysis.

6. Air, Water, and Food Analysis.

*Open to students who have completed course 1, 2 or 4, 3 or 7, and 5. Three hours a week for the first semester.*

Associate Professor Bragg.

7. Organic Chemistry, with laboratory work in organic preparations.

*Open to students who have completed two years' work in Chemistry. Three hours a week for a year.*

Professor Roberts.

8. Theoretical Chemistry.

*Open to students who have completed course 1. Three hours a week for the second semester.*

Professor Roberts.

- \*9. Stereo-Chemistry and laboratory work in connection with Theoretical Chemistry.

*Open to students who have completed course 3 or 7, and 8. Three hours a week for the second semester.*

Professor Roberts, Associate Professor Bragg.

## XV. Physics and Physical Astronomy

1. General Physics.

*Open to all undergraduates. Freshmen four hours, others three hours a week for a year.*

Miss Davis, Miss Langford.

This course is intended for students who are beginning Physics. It consists of lectures amply illustrated, followed by laboratory work. The object is to outline the elementary principles of Mechanics, Sound, Electricity, and Light, to train the powers of observation, and to teach proper methods of recording observations, and reasoning upon them.

3. Heat, Light, and Electricity.

*Open to students who have completed course 1 or an equivalent. Freshmen four hours, all other students three hours a week for a year.*

Miss Langford.

This course presupposes an acquaintance with the general principles of Physics, and aims to be more intensive in its work. Only the best instruments of precision are used, and training is given in the handling of apparatus and in the discussion of results.

Special attention is given to the needs of those preparing to teach, and opportunity is given for student lectures with illustrative experiments.

\* Not offered in 1903-1904.

4. Selected subjects in Light and Electricity, mathematically treated.

*Open to seniors who have completed course 3 and also course 3 in Pure Mathematics. Three hours a week for a year.*

Miss Langford.

Text-books: First Semester, Preston's *Theory of Light*; Second Semester, J. J. Thomson's *Mathematical Theory of Light and Electricity*, with reference reading.

It is possible to combine one semester of this course with one semester of course 5.

- † 5. Advanced Laboratory Work.

*Open to students who have completed course 3. Three hours a week for a year.*

Professor Whiting.

The aim is to present modern theories, with evidence for them gathered from individual work and consultation of original memoirs, and to develop the power of independent thought and experiment.

Among subjects which receive a different degree of emphasis according to need are polarized light, photography of spectra, wave lengths, electric discharge through gases, electric waves, electrolytic phenomena, influence of electric field on light.

- ‡ 6. Meteorology.

*Open to sophomores, juniors, and seniors. One hour a week for a year.*

Professor Whiting.

Text-books: Davis' *Meteorology*, Ward's *Practical Exercises*. The solution of inductive problems, by the use of the weather maps and records of observations, gives training in scientific reasoning. Special topics prepared and presented by students are a feature of the course.

† Withdrawn for the current year.

‡ An elementary course in Physics, either in college or in secondary school, is prerequisite to courses 6 and 7.

## ‡ 7. Physical Astronomy.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Whiting, Professor Hayes.

The subject is outlined by lectures, fully illustrated by lantern slides, charts, and apparatus. One third of the course consists of work in the Whiting Observatory, and the spectroscopic laboratory, adapted to make clear the principles by which the astronomy of measurement and the modern astrophysics have been built up.

**XVI. Geology and Mineralogy**

## 1. Geology.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Niles, Miss Fisher.

Lectures, recitations, and field work. Subjects treated: Dynamical, Structural, and Historical Geology.

A systematic and comprehensive study of the more important teachings of geological science.

## 2. Mineralogy.

*Open to sophomores, juniors, and seniors. Three hours a week for the first semester.*

Miss Fisher.

Lectures and recitations. Laboratory study of sets of specimens of the more important mineral species. Blow-pipe analysis. Crystallography. A reference collection is always available for students' use.

## 3. Advanced Geography.

*Open to students who have completed one year of Science. Three hours a week for the second semester.*

Miss Fisher.

‡ An elementary course in Physics, either in college or in secondary school, is prerequisite to courses 6 and 7.

Lectures and recitations. This course comprises a comparative study of the geographic features of the continents with their natural and political divisions. It also discusses the influence which these features have upon the life, habits, prosperity, and commercial relations of peoples and nations.

† 4. Structural Geology and Field Work.

*Open to students who have completed course 1. Three hours a week for a year.*

Miss Fisher.

Lectures, discussions, and field study. The aim of the course is to give a thorough knowledge of Structural Geology, with practice in applying the principles to the interpretations of the geology of selected localities.

## XVII. Botany

### 1. General Botany.

*Open to all undergraduates. Freshmen four hours, all other students three hours a week for a year.*

Associate Professor Cummings,  
Dr. Ferguson, Miss Torrence.

This course includes a general study of morphology, anatomy, classification, and ecology, with demonstration of the simpler laws of physiology. The interrelationship of the groups from the lowest Algæ and Fungi to the highest Phanerogams will be shown. Plants are studied as individuals and as members of plant societies, special emphasis being laid on the relation of structure to environment. An herbarium illustrating the principles of morphology, ecology, and classification is required. Recitations, lectures, and demonstrations, accompanied by parallel studies in the laboratory and field. This course is introductory to all other courses in Botany.

†Withdrawn for the current year.

## 2. Cryptogamic Botany.

*Open to students who have completed course 1. Three hours a week for a year.*

Associate Professor Cummings.

A study of the morphology, reproduction, and development of the lower forms of plant life.

In the autumn special attention is given to the study of mushrooms, both in field and laboratory, with reference to poisonous and edible forms. In the spring term the work is largely individual. It is intended that this course shall supplement Botany 1 in giving a general survey of the plant kingdom.

## \*3. Systematic and Economic Botany.

*Open to students who have completed course 1, and to other students upon advice of the professor. Three hours a week for a year.*

Associate Professor Cooley.

This course includes a consideration of the special morphology, classification, and distribution of flowering plants. The fundamental principles of plant geography are studied in connection with the orders of plants. An important part of the course deals with the economic value of plant products. This work is conducted in the laboratory, field, and greenhouse.

## \*4. Medical Botany.

*Open to students who have completed courses 10 and 11. Three hours a week for a year.*

Associate Professor Cooley.

Microscopical examination of the typical and important roots, rhizomes, stems, leaves, barks, and fruits of the Pharmacopœia. This course is intended to give familiarity with the botanical characters of the more common medicinal plants, thus aiding in the identification of the

\* Not offered in 1903-1904.

crude drugs derived from them and in the detection of adulterations. The active principles of such drugs, and peculiar modes of action, are also investigated.

\* 6. Plant Biology.

*Open to students who have completed course 2. Three hours a week for a year.*

Associate Professor Cooley.

Gross anatomy, histology, and physiology of a series of plants, considered as types, proceeding from the simpler to the more complex organisms. Special attention will be given to tracing the development of organs and the evolution of forms.

† 7. Plant Embryology and Cytology.

*Open to students who have completed courses 10 and 11. Three hours a week for a year.*

Dr. Ferguson.

A comparative study of the development of the reproductive organs in the great groups, phyla, of plants. Also nuclear division and cell formation with special reference to the development of the gametophytes in Phanerogams. When this course is taken as a major for an advanced degree more time will be required, and a special problem will be assigned for investigation.

8. Advanced Cryptogamic Botany. Systematic study of any chosen group or groups of Cryptogams.

*Open to students who have completed course 2. Three hours a week for a year.*

Associate Professor Cummings.

\* 9. Trees and Forestry.

*Open to students who have completed course 1. Three hours a week for a year.*

Associate Professor Cooley.

The subjects studied in this course are forest botany and silviculture; the forests of the world, their value and the

\* Not offered in 1903-1904.

† Withdrawn for the current year.

uses of their products; protection of woodlands and forest regulations. The work is largely conducted out of doors.

10. Comparative Histology of Plants and Microscopical Technique.

*Open to students who have completed or are taking course 2. Three hours a week for the first semester.*

Dr. Ferguson.

A study of the structure, development, and contents of the cell; cell multiplication and tissue formation; the structure and development of primary tissues; secondary thickening. Special attention is given to the technique of the microscope and to microchemical methods of fixing and staining.

11. Plant Physiology.

*Open to students who have taken course 10. Three hours a week for the second semester.*

Dr. Ferguson.

The lectures of this course take up in detail the more important problems of plant physiology, including nutrition, the effects of stimuli upon cell activities, growth, irritability, development, and reproduction. The laboratory study consists of experimental work in plant physiology. A knowledge of the elements of Physics and Chemistry is very desirable for courses 10 and 11.

12. General Horticulture and Elementary Landscape Gardening.

*Open to students who have completed course 1. Three hours a week for a year.*

Mr. Adams.

Lectures on the preparation of soils, propagation and cultivation of plants, including planting and pruning; school gardens and planting designs, including a brief consideration of the plants used in practical planting.

The lectures will be supplemented by reading, work in the greenhouse, practice in making planting plans, practical work in field and visits to gardens, nurseries, and estates in the vicinity.

## XVIII. Zoology and Physiology

### 1. General Biology.

*Open to freshmen and sophomores. Freshmen four hours, all other students three hours a week for a year.*

Miss Alice W. Wilcox, Miss Turner, Miss Holt.

The main object of this course is to train students in accurate methods of observation and thought, and to illustrate fundamental principles of life. The course includes laboratory work, field work, and lectures. In the fall some of the common orders of insects are studied, with special reference to their life-histories, habits, and economic importance. A thorough study is made of the frog as a typical animal, and of the fern as a typical plant. The fundamental unity of the animal and vegetable kingdoms is shown by a comparison of the anatomy, physiology, and development of the frog and the fern, and by a study of unicellular animals and plants. The principle of evolution is illustrated throughout the course. During the second semester one appointment weekly is given to the study of birds.

### 2. General Zoology.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Miss Merritt.

Comparative study of all the great groups (phyla) of animals, beginning with unicellular organisms and concluding with mammals. Also a few lectures on vertebrate embryology.

This course aims to present the outlines of animal structure and classification, and to give familiarity with the commoner forms.

Courses 1 and 2 together will meet the admission requirement in biology of the Johns Hopkins Medical School.

### 3. Anatomy of the Cat.

*Open to students who have completed course 1 or course 2. Three hours a week for the first semester.*

Miss Bowers.

This course is intended to train students in careful dissection. It is especially fitted for those who intend to study medicine. Constant reference will be made to human anatomy, and a lightening of the ordinary course in that subject in a medical school can be effected by taking this work.

#### 4. Embryology of the Chick.

*Open to students who have taken or are taking course 2. Three hours a week for the second semester.*

Miss Bowers.

This course, by a thorough study of the development of the chick, introduces the student to the general principles of embryology. Training is given in the mounting of embryos and in the preparation of serial sections.

#### \*5. Natural History of Animals.

*Open to students who have completed or are taking course 2. Three hours a week for a year.*

Professor Willcox.

Collection and classification of animals; study of habits; readings in natural history; excursions to neighboring museums; microscopic mounts of minute animals.

#### 6. Zoological Seminary.

*Open under the advice of the professor to students who have completed two full courses. Three hours a week for a year.*

Miss Alice W. Wilcox.

Readings and discussions of Darwin, Spencer, Wallace, Weismann, and kindred authors. One careful paper on a biological subject prepared by each student.

#### 9. Animal Histology and Histological Technique.

*Open to students who have completed course 1 or course 2. Three hours a week for a year.*

Dr. De Lue

\*Not offered in 1903-1904.

A study of the microscopical anatomy of the cell, tissues, and organs. Laboratory work includes a training in the methods of making mounted preparations, a certain number of which are required from each student. Lectures are upon the comparative structure and the evolution of the tissues.

\*10. Animal Physiology.

*Open to students who have completed course 1 or course 2. Three hours a week for a year.*

Lectures and laboratory work dealing with experimental and theoretical questions in physiology, such as the structure and action of muscle, nerves, blood vessels, the heart, blood, the formation and action of digestive juices, excretion, metabolism, the special sense organs, the brain, etc. Each student arranges and uses the apparatus necessary for almost all experiments; but some of the more difficult are performed by the instructor, assisted in turn by the different members of the class.

*Apparatus needed by students in this department.* Microscopes, reagents, etc., are provided by the college. Certain dissecting instruments may be rented from the college; others must be provided by the students.

The instruction in all courses of the Zoology department, except 6, is given through practical work in the laboratory, accompanied by lectures, three appointments per week, one hour and a half each. Course 6 requires no laboratory work, and the appointments are forty-five minutes each.

## Hygiene

1. Physiology and Hygiene.

*Required of freshmen. One hour a week for a year.*

Miss Sherrard

Lectures, demonstrations, and quizzes.

The subject presented is the proper care of the body, and the course is designed to give a practical knowledge of its

\* Not offered in 1903-1904.

structure and an understanding of the laws of life and health. An outline is also given of the general principles of public hygiene.

## XIX. Pedagogy

### 1. Science of Education.

*Open to juniors, seniors, and graduates. Three hours a week for a year.*

Associate Professor McKeag.

This course attempts to base principles of education upon the data of science. It sketches rapidly the civilizing and educative influence of the arts of primitive peoples. It studies educational processes at various stages of the child's development, and considers educative material suitable at different periods of his life. This course also includes a general study of the child's growth and physique, and it presents school hygiene in detail.

### 2. History of Education. Educational theories.

*Open to juniors, seniors, and graduates. Three hours a week for a year.*

Associate Professor McKeag.

This course aims to present a general view of the great movements in education; to trace the development of its institutions, and to select characteristic features of its accepted systems. Emphasis is placed on modern educational theories. The child-study movement is considered. Detailed studies are made of certain practices and problems of the American public schools of the present time.

NOTE.—Course 1 is recommended to students who are specializing in the departments of science, philosophy, mathematics, or art. Course 2 is designed primarily for students who are specializing in language, literature, or history.

## 8. Philosophy and Art of Teaching.

*Open, on the approval of the department, to graduates who have completed or are taking course 1 or 2. Two hours a week for a year.*

Associate Professor McKeag.

This course attempts to present both the philosophy and the art of instruction. It considers the nature and elements of the teaching process; aims and ideals in school-room practices, and the basis of methodology. It examines in some detail the art of study, and briefly considers discipline and incentives.

## \*9. Methods of Teaching.

*Open to students who have completed course 8. Four hours a week for the second semester.*

This course considers methods of teaching elementary school subjects, and discusses from a similar point of view the teaching of English and foreign languages, science and mathematics in secondary schools.

## XX. Bibliography

### \*1. Bibliography.

*Open to sophomores, juniors, and seniors. One hour a week for a year.*

This course aims to familiarize the student with bibliographical works and with library methods and catalogues, to teach the best methods of reaching the literature of a subject, and to furnish bibliographical lists of value in future study. It is designed primarily for students taking courses in English literature, philosophy, history, economics, and the history of art, and for those intending to make library work a profession.

\* Not offered in 1903-1904.

## XXI. Elocution

## 1. Training of the Body and Voice.

*Open to sophomores, juniors, and seniors; to freshmen by special permission. Two hours a week for a year.*

Miss Bennett, Miss Chamberlain.

Body; poise and bearing. Voice; correct method of breathing, etc. Reading, with special reference to a good use of the voice. Recitations.

## 2. Training of the Body and Voice. Expression.

*Open to students who have completed course 1, or an equivalent course. Two hours a week for a year.*

Miss Bennett.

Voice culture; exercises for freedom of body; gesture; recitations from the best authors; reading at sight.

## 3. Reading of Shakespeare.

*Open to students who have completed course 1 and 2, or to those who have completed or are taking English Literature 9; to others at the discretion of the instructor. Two hours a week for a year.*

Miss Bennett.

Analysis of characters, reading, scenes selected for memorizing and acting.

## XXII. Art

## \* †1. History of Architecture. From the earliest times to the year 1000 A. D.

*Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours a week for a year.*

Mr. Holt.

\* Not offered in 1903-1904. It is intended to offer courses in the History of Greek Sculpture in 1904-1905.

‡ Courses 1 and 9, and 3 and 10, are alternate courses; they will not both be given in the same year.

\*2. Outline History of Greek Sculpture.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

†3. History of Italian Painting through the Fifteenth Century.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Mr. Rankin.

In this course the development of Italian painting will be traced from the early mosaics to Botticelli and Mantegna; critical study will be given to the position and quality of the artists, as well as to the characteristics and relations of the different schools.

5. Studio Practice.

*Open to sophomores, juniors, and seniors. One hour a week for a year.*

Professor Brown, Miss Moore.

Drawing and sketching. No prerequisites.

14. Studio Practice.

*Open by permission of the instructor to students who are taking or have completed Art 5. One hour a week for a year.*

First semester, Professor Brown.

Second semester, Mr. Woodbury.

15. Studio Practice. Drawing and Color Work.

*Open by permission of the instructor to students who are taking or have completed Art 14. One hour a week for a year.*

First semester, Professor Brown.

Second semester, Mr. Woodbury.

\* Not offered in 1903-1904. It is intended to offer courses in the History of Greek Sculpture in 1904-1905.

‡ Courses 1 and 9, and 3 and 10, are alternate courses; they will not both be given in the same year.

Conduct of this course same as that of 14.

The studio courses count toward the degree after one course in the History of Art has been completed.

\*7. History of Greek Sculpture. Seminary.

*Open to graduates and seniors, and by permission of the instructor to students who have completed Art 2. Three hours a week for a year.*

In this course one limited period of Greek sculpture will be carefully studied.

A part of the work will be carried on in the Museum of Fine Arts in Boston.

All must read in preparation "Handbook of Greek Sculpture," by Ernest A. Gardner.

8. History of Italian Painting. Seminary.

*Open to students (to juniors by special permission) who have completed Art 3, and to others by permission of the instructor. Three hours a week for a year.*

Mr. Rankin.

The aim of this course is to study a given epoch in detail, and to train students for independent work. In preparation for this course an acquaintance with the outline of the history of Italian painting is required.

‡9. History of Architecture from the year 1000 to the present time.

*Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours a week for a year.*

Mr. Holt.

The aim of this course is to give a general view of the development of styles and a thorough understanding of

\* Not offered in 1903-1904. It is intended to offer courses in the History of Greek Sculpture in 1904-1905.

‡ Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.

their essential elements, both constructive and decorative, during the period studied.

First semester. Introduction to the subject, and history of architecture during the Romanesque and Gothic periods, from 1000 A. D. to the Renaissance.

Second semester. Architecture from the beginning of the Renaissance to the present time.

\*†10. History of Italian Painting during the Renaissance.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

§12. Elementary Course.

*Open to freshmen only. Four hours a week for a year. No prerequisites.*

Professor Brown, Miss Moore.

Designed for freshmen who enter college with the intention of specializing in Art. This course is a combination of history and practice, and will include an introductory study of the History of Architecture, Sculpture and Painting, illustrated by sketching from photographs, and by practical studio work in drawing, composition, and modeling in clay. It will be conducted by the scientific method of laboratory observation and practice. No other work may be substituted for the laboratory practice.

§13. Introductory Course.

*Open to sophomores, juniors, and seniors. Three hours a week for a year. No prerequisites.*

Professor Brown.

This course furnishes an outline of the general development of styles in Architecture, Sculpture, and Painting.

\* Not offered in 1903-1904.

† Courses 1 and 9, and 3 and 10, are alternate courses; they will not both be given in the same year.

§ In 1904-1905 and thereafter Art 12 or Art 13 will be a prerequisite to further election for all students except seniors.

Its method of constant laboratory work leads directly into the methods of the more advanced courses in the department.

This course is complete in itself, but it may be taken in preparation for other courses.

This course is not open to students who have taken or are taking any other history course in the Art Department.

---

Students in art courses are required to use laboratory methods, examining and comparing, sketching or describing the photographs used in illustration.

Previous preparation in drawing is not required, but it is desirable that all students who intend to take courses in Art should be prepared to present specimens of any drawing that they may have done.

The art library is open to students from 9 to 5.30 daily, and from 7 to 9 in the evening.

N. B. Any student who desires to give yearly the time of one full course to studio work throughout her college course may do so by spending five years in college before taking her degree, instead of four.

## XXIII. Music

### I. Musical Theory

Instruction in music is given in Music Hall, a large brick building, used exclusively for this purpose. (See page 129.) The department aims to lay a foundation of musical knowledge that shall lead to a rational appreciation of the art of music and add a cultural element to a general education. The courses in theory and history are open to advanced freshmen (five-year music course), sophomores, juniors, and seniors without restriction as to previous musical knowledge, and count toward the B.A. degree. They are open to all special students. The history and theory courses are subject to no separate tuition fee with the exception of courses 9, 10, 11, 12, where a nominal fee of five dollars is charged for tuning and repairs of instruments. The following sequences of courses are recommended: 8,

1; 8, 1, 9; 8, 4; 8, 4, 10; 8, 1, 6-7; 8, 1, 6-7, 11-12; 8, 1, 4; 8, 1, 4, 10; 8, 1, 9, 4, 10. A limited number of reserved seat tickets to the Boston Symphony concerts will be given to students who are able to use them profitably.

## 8. Foundation Principles.

*Open to advanced freshmen (five-year music course), sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Macdougall.

This course covers the ground necessary for admission to courses 1 or 4, and also offers a substantial foundation for subsequent work in practical or theoretical music. It includes the study of elementary acoustics in its relation to music; the Greek modes; the intervals; the modern scales; the formation and connection of the fundamental triads; the elements of rhythm and melody. Much attention will be devoted to ear training, and one hour of the course every week will be devoted to the realization of the principles of the course in choral practice. Students electing this course should be able to "carry a tune"; the quality of voice does not matter; if in doubt as to qualifications the student should consult the head of the department.

### 1. Harmony.

*Open to students who have completed course 8. Three hours a week for a year.*

Professor Macdougall.

This course covers the formation and interconnection of chords; modulation; non-harmonic tones; analysis of harmony in standard works; invention of melodies and the expansion of the harmonic accompaniment. The course aims to give some facility in elementary composition.

## 9. Applied Harmony.

*Open to those students only who are at the same time taking course 1. Two hours a week for a year. A laboratory fee of five dollars is attached to this course.*

Professor Macdougall, Miss McIntire.

This course aims to realize synthetically at the pianoforte the principles taught in course 1, following what may be termed a laboratory method.

NOTE.—Instruction will be given in classes of not less than three nor more than four. The course is in no sense a substitute for pianoforte lessons. Students must satisfy the head of the department that they have a pianoforte technique adequate for the work: in general, the ability to play the easier Mendelssohn Songs without Words and to read hymn tunes accurately at sight will be sufficient.

#### 4. The Development of the Art of Music.

*Open to students who have completed course 8. Three hours a week for a year.*

Professor Macdougall.

A course in the appreciation of music designed to develop musical perception and the ability to listen intelligently to the best music. It includes the evolution of rhythm, harmony and melody, and their powers and offices in musical expression; the principal musical forms historically considered; studies of the principal composers, their lives, their strongest works, their relation to the progress of musical art. Some great work will be selected for study during the year.

#### 10. Applied History.

*Open to those students only who are at the same time taking course 4. Two hours a week for a year. A laboratory fee of five dollars is attached to this course.*

Professor Macdougall, Miss Hurd.

This course aims to realize synthetically at the pianoforte the development of music from the organum of Hucbald to the Wagner opera. Specimens of the music of various schools and periods will be collected, played, and analyzed. (See note to course 9.)

\*6. Counterpoint.

*Open to students who have completed course 1. Three hours a week for the first semester.*

Professor Macdougall.

Counterpoint in two, three and four voices; double counterpoint; analysis; the distinctions between strict (modal) and free counterpoint; the rules for the latter deduced from contemporaneous practice.

\*11. Applied Counterpoint.

*Open to those students only who are at the same time taking course 6. Two hours a week for the first semester. To this course a laboratory fee of two dollars and a half is attached.*

Professor Macdougall.

This course aims to realize synthetically at the piano-forte the laws of simple and double counterpoint by the constant playing and analysis of the best examples from the masters. (See note to course 9.)

\*7. Musical Form.

*Open to students who have completed course 6. Three hours a week for the second semester.*

Professor Macdougall.

This course aims to cover the various imitative forms, the suite and sonata forms, the large forms of vocal and orchestral music. A study of the simple musical sentence and its development into the larger forms will be made.

\*12. Applied Form.

*Open to those students only who are at the same time taking course 7. Two hours a week for the second semester. To this course a laboratory fee of two dollars and a half is attached.*

Professor Macdougall.

This course aims to play and to analyze a great number of specimens of the various forms, with careful analysis and classification. (See note to course 9.)

\* Not offered in 1903-1904.

## II. Practical Music (Instrumental and Vocal Lessons)

It is believed that students having command of pianoforte or organ technique will be able to profit by the theoretical instruction given in the department to a fuller degree than those without such a technique. To encourage students to acquire a technique as well as to furnish authoritative instruction the department undertakes to give lessons in pianoforte, organ and violin playing and in singing. Practical work, with the exception of the applied music courses 9, 10, 11 and 12, does not count toward the B.A. degree.

Instruction in instrumental and vocal music is offered to students as indicated below:—

(a) Candidates for the B.A. degree who propose to spend but four years in college, may take practical music, provided that they obtain each year the permission of the Dean of the College as well as of the Professor of Music. Freshmen may do so without taking Musical Theory, but sophomores, juniors, and seniors must take it unless they have previously completed two full courses in the subject.

(b) Candidates for the B.A. degree *who are willing to devote five years to the college course*, will be permitted to take practical music each year of the course. Freshmen may do so without taking Musical Theory, but all other students in the academic and musical course are governed by the restriction laid down in (a).

(c) Candidates for the B.A. degree who wish also the *Certificate of the Department of Music* should plan to devote *five years to the college course*. Such students are required to take practical music, two lessons a week, throughout the five years. They must complete, satisfactorily to the department, a course in the literature of the instrument chosen or of the voice; they must apply for the certificate at least three years in advance. After the first year the study of Musical Theory is required.

(d) Students not candidates for the B.A. degree *who desire to specialize in Music* must meet the requirements prescribed for admission to the freshmen class, and must in addition pass an examination on the rudiments of music. This examination will be based upon W. H. Cummings' *Rudiments of Music* (No. 2 of Novello Company's Music Primers), chapters 6, 9, and 10 omitted. Special students must take both Musical Theory and vocal or instrumental lessons, two a week, with not less than twelve hours of weekly practice. They must also take from six to nine hours per week of academic work, including Musical Theory, as may be decided in consultation with the Dean.

(e) Students not candidates for the B.A. degree who wish the *Certificate of the Department of Music* must comply with the conditions laid down in (d); moreover, the academic work taken must include modern languages. Such students must apply for the certificate on entering the department and must have already acquired the fundamental technique of the instrument chosen or of the voice. The time occupied in study for the certificate depends upon the talent, upon the proficiency of the student at entrance, and upon her subsequent diligence; but in general four years at least are necessary. The various courses are so arranged that the pupil on completion will have an acquaintance with the best musical literature.

(f) Graduates of Wellesley College or of other institutions may make special arrangement for instrumental or vocal lessons.

### Tuition

For instruction for the college year in Pianoforte,

Organ, or Violin, two lessons a week . . . . .	\$100 00
One lesson a week* . . . . .	50 00

(Lessons forty-five minutes in length.)

\* Two lessons a week insure much more rapid progress, while, in comparison with one weekly lesson, they do not involve any material increase in the time spent in preparation.

Two half-hour lessons a week . . . . .	\$75 00
For instruction for the college year in Vocal Music, two lessons a week . . . . .	100 00
(Lessons thirty minutes in length.)	
For use of the Pianoforte, sixty minutes daily, for the college year . . . . .	10 00
For two and three hours daily, in proportion.	
For use of the Pipe Organ in Music Hall, sixty min- utes daily for the college year . . . . .	15 00
For two or three hours daily, in proportion.	

Special arrangements may be made for lessons on instruments not mentioned above.

Tuition in music must always be paid in advance and is not subject to return or deduction.

All students are subject to the charges for academic tuition stated on page 117.

## College Examinations

An examination period occurs at the end of each semester. At these periods, and also during the days of the admission examinations in September, examinations for the removal of conditions and deficiencies and for advanced standing may be taken.

A student who wishes to take an examination upon a course which is not a part of her approved schedule for the year, must apply to the Dean for the requisite card of admission to the examination. The last day for receiving applications for such cards is, *for the September examinations, September first; for the mid-year examinations, January fifteenth; for the June examinations, June first.*

N. B. Examinations for the removal of conditions and deficiencies being excepted, no student can be admitted to examination upon a course which is not a part of her approved schedule for the year without permission both from the head of the department concerned and the Dean of the College. *No student, therefore, should enter upon preparation for such an examination until her plan has been approved by both of the above-named officers.*

 The College reserves the right to require the withdrawal of students whose scholarship is not satisfactory.

## Degrees

The following degrees are conferred by the Trustees upon recommendation of the Academic Council :—

Bachelor of Arts.

Master of Arts.

### Requirements for the B.A. Degree

Every candidate for the B.A. degree must complete before graduation the equivalent of fifty-nine‡ one-hour courses.\* Since 1896, two grades in work which reaches the passing mark have been distinguished: one, "*Passed*;" the other, "*Passed with credit*." In order to be recommended for the degree of Bachelor of Arts, a student must have "*Passed with credit*" in at least twenty-nine and one half hours of work, of which seven and one half hours have been accomplished in the senior year. Of the fifty-nine hours required for the B.A. degree, a certain number is prescribed, the rest elective.

I. PRESCRIBED. Courses in the following subjects are required as specified :—

Mathematics, one full course†; Philosophy, one full course; Physiology and Hygiene, one one-hour course\*; Biblical History, the equivalent of four one-hour courses; English, the

\* A one-hour course is a course given once a week for one year.

† A full course is a course given either three or four times a week for one year.

‡ In June, 1905, and thereafter, the requirement will consist of the equivalent of fifty-seven one-hour courses. In order to be recommended for the B.A. degree, a student must have "*passed with credit*" in at least thirty-three hours, of which nine hours have been accomplished in the senior year. First-year French and first-year German may not *both* be counted among the fifty-seven hours. *Neither* first-year French nor first-year German may be so counted if taken after the sophomore year, and neither second-year French nor second-year German if taken after the junior year.

equivalent of four one-hour courses ; Language, one full course ; Natural Sciences, two full courses. The science courses must be in different departments. If a student offers science for admission, only one full course of natural science is required in college.

Of the required subjects, Mathematics must be taken in the freshman year ; Physiology and Hygiene in the freshman year ; Biblical History, one hour per week in the freshman and sophomore years, two hours per week in the junior year ; English, one hour per week in the freshman and junior years, and two hours per week in the sophomore year. Of the natural sciences, one must be taken before the junior year, the other may be elected at any time during the course ; language may be taken in any year, but either a language or a science must be taken in the freshman year. Philosophy should ordinarily be taken before the senior year.

II. ELECTIVE. All of the fifty-nine hours not indicated in the above are elective, subject only to the restriction that the equivalent of eighteen one-hour courses must be taken in one of the following ways :—

(a) Nine in each of two subjects, related or unrelated.

(b) Nine in one subject, with nine divided between two tributary subjects.

(c) Twelve in one subject, with six in a tributary subject.

(d) Twelve in one subject, with six divided between two tributary subjects.

In general, prescribed subjects may be counted in making up these eighteen hours ; but course 1 in French, course 1 in German, and course 13 in Greek may not be so counted.

Except by special permission, a student may not take fewer than ten or more than fifteen hours per week in any one year.

### Requirements for the M.A. Degree

Candidates for the degree of Master of Arts must be graduates of Wellesley College, or of some institution of satisfactory

standing, and must give evidence of ability to carry on the work for the Master's degree.

The amount of work required of candidates for the M.A. degree consists of the equivalent of from nine to twelve one-hour courses chosen from the courses described in the Circular of Graduate Instruction, and in addition either a thesis or a report or reports on one or more pieces of independent work. The student should choose one major subject, and not more than one minor subject, which should be related to the major ; or she may, if she prefers, do all her work in one subject.

One year is the shortest time in which a candidate can complete the work required, but it must be understood that only students of ability and maturity will be able to finish it in so short a time.

The work for the degree of Master of Arts will be tested by either examination or thesis, or both. Rules regarding examinations of resident students are fully stated in the graduate circular. Non-resident students will be examined in Wellesley during some one of the regular examination periods of the year in which the degree is to be conferred.

Thirty scholarships, as described on page 123, are open to accepted candidates for the Master's degree not residing in college buildings. Candidates residing in the college buildings will pay the full charge for board and tuition, \$400 per annum. Upon receiving the Master's degree a fee of twenty-five dollars will be required of each candidate.

Graduate students who have done the entire work for the M.A. degree in non-residence are accepted as candidates for this degree only when this work has been done at some institution which does not grant the M.A. degree to women, but they may under certain conditions do a portion of the work at any approved institution, including those which grant the M.A. to women, provided that the remainder is done at Wellesley. Preparation for the degree by private study is not permitted. The diploma fee is the same for resident and for non-resident students.

Circulars containing fuller information concerning graduate

work will be forwarded on application to the *Dean of the College*. It is very desirable that applications for admission as graduate students be received by June 1st of the year in which the student wishes to enter.

## Expenses

### Tuition

The charge for tuition to all students, whether living in college buildings or not, is \$175 a year. Tuition *must be paid in advance, and is not subject to return or deduction.*

Students who are permitted to take *seven hours or less* of classroom work a week, and *who do not live in the college buildings*, pay tuition by the course as follows: For a one-hour course, \$20; a two-hour course, \$40; a three-hour course, \$60. Payment is due at the beginning of the year. No charge is made for tuition in courses in Biblical History.

For tuition and other charges in the Department of Music see pages 112 and 113.

### Board

The charge for board to students living in the dormitories belonging to the College is \$225 a year.

### Fixed Times and Amounts of Payments

#### 1. *For students who are lodged in college buildings.*

The full charge for board and tuition is \$400. In addition to tuition, students lodged in college buildings pay at the opening of the College in September \$75 on account of board. The full first payment for all students lodging in college buildings is thus \$250. At the beginning of the second semester the balance for board (\$150) is due.

The charge for board (\$225) begins at the opening of dormitories, *i. e.*, twenty-four hours before the close of registration (see

page 5), and students are not permitted to occupy rooms in dormitories before that time.

2. *For students who are not lodged in college buildings.*

Students who are not lodged in college buildings make their entire tuition payment (\$175) at the time of the opening in September.

These students find rooms and board in the village of Wellesley. Payment is made to the head of the house at such rates and times as the parties to the contract may agree upon. Information regarding boarding places may be obtained by addressing the Registrar.

 *Payments must be made before the student can take her place in the class room. No exception will be made to this rule without a written permission from the Treasurer.*

 *Checks or money orders should be made payable to Wellesley College.*

### Fees

An application fee of \$10 is required from all candidates for admission, and no application is recorded until the fee is received (see page 119). The same fee is required from all students in college who are intending to return for the following year, and from all former students who apply for re-admission. This fee will be credited to the student, and a corresponding deduction made on her first payment. If the student withdraws, the fee will be returned *provided notification of withdrawal is received thirty days before the beginning of the college year.* A student who postpones entrance until the year following the one for which she first applied may transfer her application fee. But a fee so transferred will not be refunded if the student later decides to withdraw, unless the request for the transfer was received within the specified time. Requests for second transfers are sometimes granted, but a fee transferred a second time will not be refunded under any circumstances.

An additional charge is made for materials in the following laboratory courses: \$5 for each laboratory course in Botany,

Chemistry, Physics, or Zoology ; \$2.50 for the course in Mineralogy ; \$5 each for courses 9 and 10 in Musical Theory, \$2.50 each for the half courses 11 and 12 ; \$2 each for the studio courses in Art ; and \$1 each for all other Art courses. Every student should also reckon on the expenditure of \$10 to \$25 annually for the purchase of books. At the time of taking the degree a diploma fee is charged. This is \$5 for the B.A. degree, and \$25 for the M.A. degree. At the time of taking a certificate, a certificate fee of \$3 is due.

### Residence

College Hall, with three dining rooms, accommodates two hundred and fifty-seven persons ; Stone Hall, with four dining rooms, one hundred and seven ; Wilder Hall, fifty ; Freeman Cottage, forty-nine ; Wood, forty-nine ; Norumbega, forty-eight ; Eliot, thirty ; Simpson, twenty-two ; Waban, eleven ; Fiske, thirty-four. Each building contains single rooms as well as suites for two students. All the rooms are furnished, and supplied with electric lights.

 *A student vacating a room before the close of the year, or relinquishing a room reserved for her at the beginning of the year, will be charged for board at the rate of \$7 a week until the vacancy has been filled by an incoming student. Therefore notice of an intention to withdraw should be given at the earliest possible moment. No deduction is made for absences during the year.*

All applications for rooms in college buildings take the date at which the application fee is received. (See page 118.)

Until May 1st, but not after that date, *applications from former students* will take precedence of those of new students in the matter of rooms. A limited number of students can arrange for board at the College during the Christmas and spring vacations ; the charge is \$7 a week.

 *No student can receive a diploma until a satisfactory settlement of all her college dues has been made.*

## Fellowships and Scholarships

### A. For Graduates

THE ALICE FREEMAN PALMER FELLOWSHIP, yielding an income of about \$1,000, was founded in 1903, by Mrs. David P. Kimball.

The holder of the Fellowship must be a graduate of Wellesley College or some other American college of approved standing, a young woman of good health, not more than twenty-six years of age at the time of appointment, unmarried throughout the whole of her tenure, and as free as possible from other responsibilities. The same person will not be eligible to the Fellowship for more than two years.

The Fellowship may be used for study abroad, for study at any American college or university, or privately for independent research. But several times during the period of tenure evidence must be furnished that the Fellowship is being used for purposes of serious study and not for general culture.

Applications for this Fellowship should be received by the President of Wellesley College not later than February 1, 1904. Further details may be obtained from the president.

#### SCHOOLS OF CLASSICAL STUDY.

Wellesley College is a contributor to the support of the American School of Classical Studies in Athens, and the American School of Classical Studies in Rome, founded in 1882 and 1895 respectively, by the Archæological Institute of America.

The object of these schools is to afford opportunity for the study of classical literature, art, and antiquities, to aid in original research in these subjects, and to conduct the exploration and excavation of classical sites.

#### *The American School of Classical Studies in Athens.*

The school year extends from October 1st to June 1st.

The regulations for admission are as follows: "Bachelors of Arts of co-operating colleges, and all Bachelors of Arts who

have studied at one of these colleges as candidates for a higher degree, shall be admitted to membership in the School on presenting to the Committee a certificate from the classical department of the college at which they have last studied, stating that they are competent to pursue an independent course of study at Athens under the advice of the Director. Members of the School are subject to no charge for tuition." \* Further information can be had by application to Professor Chapin, who represents Wellesley College upon the Managing Committee of the School.

*The American School of Classical Studies in Rome.*

The school year extends from the fifteenth of October to the first of July. The regulations for admission are as follows: "Graduates in arts of American Colleges and universities of good standing, and under exceptional circumstances, other persons of marked qualifications, may be admitted as students of the School on submitting to the Chairman of the Managing Committee, or to the Director of the School, satisfactory evidence that their previous studies have been of such a character as to fit them to profit by the opportunities that the School offers."\*

Further information can be had by application to Professor Hawes, who represents Wellesley College upon the Managing Committee of the School.

THE MARINE BIOLOGICAL LABORATORY AT WOOD'S HOLL.

Wellesley College is a contributor to the support of the Marine Biological Laboratory at Wood's Holl,—a region especially rich in forms of marine life, both vegetable and animal. This laboratory, which is open during the summer for the study

\* A few Fellowships of \$600 each are awarded on competitive examination.

of marine life, affords opportunities both to investigators and to persons needing either instruction or direction.

In the department of Botany courses are offered for the study of marine algæ, types of fungi, and the higher cryptogams. There are also courses in ecology, physiology, and cytology, with opportunities for special investigation.

In Zoology regular courses of instruction are given in the anatomy of typical marine invertebrates and of the lower vertebrates. There are also advanced courses in the embryology of fishes, in comparative physiology, and in comparative psychology.

Students in either Botany or Zoology who desire to undertake original work will receive suitable direction. In addition to these opportunities there are courses of lectures on special topics and on subjects of general biological interest.

Wellesley College holds the right to appoint annually two students, who are entitled to all the advantages of the Laboratory without expense for tuition. Applications for appointment should state the character of the work to be done,—*i. e.*, whether botanical or zoological, whether general work, investigation under direction, or independent investigation,—and should be forwarded to Associate Professor Cummings or Miss Bowers in time to reach Wellesley College before April 1st.

#### THE ZOOLOGICAL STATION IN NAPLES.

Wellesley College is a subscriber to the support of the American Women's Table at the Zoological Station in Naples, and thus has a voice in the selection of the persons who make use of it. Such persons must be capable of independent investigation in Botany, Zoology, or Physiology. Appointments are made for a longer or shorter period, as seems in each case expedient. Applications for the use of the table may be made through the President of the College.

THIRTY SCHOLARSHIPS TO THE VALUE OF \$175 A YEAR have been established for the benefit of approved candidates for the M.A. degree in residence at Wellesley. Applications for these scholarships should be addressed to the Dean of the College, Wellesley College, Wellesley, Mass.

- THE ANNA PALEN SCHOLARSHIP of \$10,000, founded in 1902.

THE ROLLINS SCHOLARSHIP of \$8,000, founded in 1903, by Augusta and Hannah H. Rollins, in memory of their parents.

As its means allow, the Students' Aid Society also affords help to those who cannot from their own resources meet the entire expense of the college course. In many cases money is loaned to students without interest, in the expectation that whenever they are able they will repay the Society; assistance is often given partly in gifts and partly in loans. The funds at the disposal of the Society are wholly insufficient to meet the wants of applicants. Contributions of any amount will be gladly received, and should be sent to the Treasurer of the Society, Mrs. Pauline A. Durant, Wellesley, Mass.

All applications for assistance should be made by letter, addressed to the Secretary of the Students' Aid Society, Wellesley, Mass., before the first of May preceding the college year for which the aid is needed.

In two cottages a reduction of \$100 is allowed on payment for board under certain conditions.

### **Health and Physical Training**

The health of students is under the charge of the resident Health Officer and the College Physician. These two officers, with the Director of Physical Training and the President and the Dean of the College, constitute the Board of Health, to which all matters affecting the health of students are referred. Two hospital wards, with the constant attendance of a trained nurse, are maintained in College Hall. There is also an emergency ward in an isolated building. No charge is made for the ordinary services of the Health Officer, College Physician, or resident nurse.

A course in Physiology and Hygiene, one appointment per week for a year, is required of freshmen.

The Gymnasium is equipped with apparatus for Swedish gymnastics.

The lake, playground, hockey field, tennis and basket ball courts furnish opportunity for organized sports which are under the supervision and instruction of the Director of Physical Training. The boathouse gives shelter to barges for the class crews and to many private boats. A swimming pool has been formed by enclosing with floats a portion of Lake Waban. Adjoining the swimming pool and boathouse is a small bath house furnished with shower baths.

Three hours per week of physical training are required of freshmen and sophomores. Each student on entrance receives a thorough physical examination which includes measurements and strength tests. This examination is repeated at stated intervals during the college course.

The requirement in physical training is met in the spring and fall terms by walking and outdoor sports; in the winter term by gymnastics, supplemented by walking and skating. The form and amount of exercise are prescribed or advised on the basis of the physical examination to meet the need of the individual; therefore no student is excused from the requirement in physical training.

A limited number of upper class students is accommodated in the Gymnasium.

Instruction in swimming and riding can be obtained in schools near Wellesley.

## Library

THE LIBRARY of the College, endowed by Eben Norton Horsford, now numbers 54,813 volumes, including the Departmental and Special Libraries enumerated below. The General Library is open on week days from 8 A. M. to 9.30 P. M., and on Sundays from 9 to 11 A. M. and from 2 to 6 P. M. Students have direct access to the shelves. The library is catalogued by author and subject entries, and the most recent and useful

bibliographical aids are provided; special effort is made by the librarians to train students in methods of research. A practical course of instruction in Bibliography is given by the Librarian in connection with college courses in literature, art, philosophy, history, and economics.

The Library subscribes for five daily and eight weekly papers and for one hundred and fifty-seven American and foreign periodicals. The list includes the most important representatives of the branches of instruction comprised in the college curriculum.

THE GERTRUDE MEMORIAL LIBRARY, established by Mr. A. A. Sweet, the MISSIONARY LIBRARY, and other collections in the General Library, furnish 4,629 volumes for Biblical study and religious reading.

THE LIBRARY OF AMERICAN LINGUISTICS, a special gift from Mr. Horsford, numbering 1,420 works, comprises the valuable collections of Major J. W. Powell and Mr. Horsford relating to North American Indian languages.

The following collections are placed in the laboratories of the respective departments:—

Art Library, 1,750 volumes.

Library of Botany, 1,962 volumes.

Library of Physics and Astronomy, 2,456 volumes.

Library of Zoology and Physiology, 1,948 volumes.

Library of Chemistry, 1,143 volumes.

### **The Farnsworth Art Building and Art Collections**

The Farnsworth Art Building, the gift of the late Isaac D. Farnsworth, was opened in September, 1889. Besides a lecture room, galleries for collections, and studios for those engaged in drawing and painting, a special feature is the

arrangement of laboratories and libraries, so that the books and art material relating to particular subjects and periods can be made immediately available to general students.

The Art Collection consists of a large number of photographs and other material, including the James Jackson Jarves collection of laces and vestments; a collection of Indian baskets, the gift of Mrs. Rufus S. Frost, and the Stetson collection of modern paintings.

Over five thousand photographs have been added to the art collections during the past five years.

### Music Hall

Music Hall is a large brick building devoted entirely to the Department of Music. It has an adequate equipment of instruments for students' use, a hall for choral practice and thirty-eight practice rooms of good size. Organ instruction is given not only on the older type of organ, but also on a large, three-manual electric organ embodying the latest principles of organ construction. Constant reference will be made to the use of the organ in church.

## Laboratories and Scientific Collections

### Botany

For the use of students in morphological, histological, and physiological work there are four laboratories, each of which is thoroughly equipped for its special purpose. The laboratory for advanced work has also the necessary physical and chemical apparatus, and such other appliances as are requisite to enable students to carry on independent research.

The collections illustrative of Botany include: the herbarium, containing upward of eight thousand phanerogams and about seven thousand and five hundred cryptogams; a generic collection mounted under glass; a collection of

woods, fruits, and economic vegetable products and a set of drugs fully illustrating the pharmacopœia; two hundred charts by Henslow, Kny, Dodel, Tschirch, and others; a collection of Auzoux's botanical models, illustrating the structure of both flowering and flowerless plants; Brendel's glass models of cryptogams; a collection of lantern slides.

In addition to the working collections a permanent museum is being arranged, which now numbers more than five thousand specimens.

### Chemistry

The department of Chemistry occupies a separate building, which contains two lecture rooms and the chemical library in addition to the rooms fitted up for laboratory work. Separate rooms are provided for work in General and Organic Chemistry, Qualitative and Quantitative Analysis, Air and Water Analysis, and Food Analysis. The building is conveniently arranged and well equipped with necessary apparatus and appliances.

### Geology and Mineralogy

The mineralogical specimens are arranged in three collections. One collection is exhibited in glass cases, and illustrates the variety and finer qualities of mineral specimens; also by its arrangement with labels for the groups into which it is divided, it shows the classifications of minerals, and, to some extent, their association.

Another collection is used for reference. It contains well-characterized specimens of the more common species. The specimens are labeled and arranged in drawers, and the collection is always accessible to students taking Mineralogy.

There is a third collection, which is used for teaching purposes. It comprises smaller but well-selected specimens, which are systematically arranged in small wooden trays with

numbers, but without labels. During an exercise each student has one of these trays, which presents objectively the subject of the lesson.

The room containing these collections is supplied with tables equipped with appliances for testing specimens and laboratory work.

The geological collection of specimens used in teaching the kinds of rock, rock structures, the fossil evidences of life and their succession in past times, is so arranged in cases and labeled that it permanently illustrates these topics.

### Mathematics

The collection of mathematical models consists of a set of models of simple solids, surfaces of the second and higher orders, and circular sections of surfaces of the second order. They are executed in wood, thread, card, and plaster.

### Physics

The department of Physics occupies a convenient lecture room, provided with arrangements for sunlight and lantern projection and adequate apparatus for illustrative experiments.

Laboratories for students are equipped with instruments adapted to a wide range of work. Rooms are especially fitted for photometry, photography, spectroscopic work, and electrical measurements. A workshop is provided with lathe and tools. A steam engine and two dynamos are connected with the laboratories.

The Whitin Observatory is supplied with a twelve-inch refracting telescope with micrometer, spectroscope, and photometer attachments, a three-inch broken-transit, a concave grating spectroscope, and a collection of minor instruments and photographs.

Meteorological instruments, including thermometer shelter, thermograph, barograph, anemometer, and anemoscope, are installed at the observatory.

### Psychology

The work of the laboratory is carried on in seven rooms (among which are dark-room and lecture-room) with electrical connections. The equipment, includes Sanford's chronograph and vernier chronoscope; a chronoscope with electrical connections upon the principle of the vernier; an electric motor; a pneumograph, plethysmograph, tambours, and a kymograph; an automatograph and finger-dynamometer; Lough's electrically actuated pendulum and Mälzel's mercury contact metronome, to either of which may be attached the time-marker, an electric pen, used with the kymograph; Zwaardemaker's clinical and fluid-mantle olfactometers, with a large collection of smell material; a pair of Titchener's electric motor color-mixers, a campimeter, a Wheatstone stereoscope; the Hering simultaneous contrast apparatus; the apparatus of Münsterberg and of Titchener for the localization of sound; Galton's piston whistle; Quincke's tubes, tuning-forks and sonometers; the Jastrow memory apparatus; a pressure-balance, æsthesiometers, graduated weights, etc.; and apparatus for special investigations. Students have the use of models and plates of the brain, and of dissecting instruments.

### Zoology

There are three laboratories for the study of Zoology and Animal Physiology. They are equipped with microscopes, microtomes, incubator, and the more special pieces of apparatus for physiological work.

The Zoology Museum contains a typical collection of both vertebrates and invertebrates, and a considerable number of models by Ziegler, Blaschka,\* Auzoux, and Deyrolle. There are also excellent collections of the local birds and of insects.

## Needs of the College

Wellesley College, established by private benevolence, entered upon its work with a costly material equipment, but with no endowment in money.

The endowment of the library by Mr. E. N. Horsford, the later contributions of Mr. Rockefeller and others to general and special endowment, have greatly relieved the burden resting upon the College. Yet to-day the receipts from board and tuition fees form the main resource with which to meet running expenses and annual repairs, and to make those additions to apparatus and buildings which are demanded by the constant advance and expansion of college instruction throughout the country.

It must be evident that the past outlay has been amply justified by results. Notwithstanding the peculiar dependence of the College upon the number of students admitted and retained, the first twenty-eight years of its existence have been attended by a constant rise in the academic standard. From Wellesley have been graduated over two thousand young women, who have carried the fruits of their college training into the schools and households of their country, and into benevolent work at home and abroad. It is believed that the College can with full confidence appeal to the public at large for further aid.

Among the urgent needs of the College are the following :—

1. Unrestricted funds for defraying general expenses.
2. A library building.
3. A science building.
4. A gymnasium building.
5. The endowment of the presidency and professorships.

## Forms of Bequest

---

*I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of \_\_\_\_\_ dollars, to be appropriated by the Trustees for the benefit of the College in such manner as they shall think will be most useful.*

---

*I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of \_\_\_\_\_ dollars, to be safely invested by it, and called the \_\_\_\_\_ Scholarship Fund. The interest of this fund shall be applied to aid deserving students in Wellesley College.*

## Honor Scholarships

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of three and one-half years' work, to juniors on the basis of two and one-half years' work. The standard in each case is absolute, not competitive.
